

engineering, maintenance, and qualification criteria, as determined by the Corps during an Initial Eligibility Inspection (IEI). To retain an Active status, Federal and non-Federal flood control works must continue to meet inspection criteria set by the Corps, as determined by the Corps during a Continuing Eligibility Inspection (CEI). All flood control works not in an Active status are considered to be Inactive, regardless of whether or not they have previously received a Corps inspection, or Corps assistance.

(d) *Modification of flood control projects.* Modification of a flood control project to increase the level of protection, or to provide protection to a larger area, is beyond the scope of Public Law 84-99 assistance. Such modifications to Federal projects are normally accomplished under congressional authorization and appropriation, or under Continuing Authorities Programs of the Corps. Such modifications to non-Federal projects are normally accomplished by the non-Federal sponsor and local interests. Modifications necessary to preserve the structural integrity of an existing non-Federal flood control project may be funded by the RIP, but such work must meet the criteria established in § 203.47 to be eligible for funding under Public Law 84-99.

§ 203.42 Inspection of non-Federal flood control works.

(a) *Required inspections.* The Corps will conduct inspections of non-Federal flood control works. These inspections are IEI's and CEI's. Conduct of IEI's and CEI's will be as provided for in § 203.48.

(1) Corps involvement with any non-Federal flood control work normally begins when the sponsor requests an IEI. The Corps will conduct an IEI to determine if the flood control work meets minimum engineering and maintenance standards and is capable of providing the intended degree of flood protection. An Acceptable or Minimally Acceptable rating (see § 203.48) on the IEI is required to allow the project to gain an Active status in the RIP.

(2) CEI's are conducted periodically to ensure that projects Active in the RIP continue to meet Corps standards, and to determine if the sponsor's main-

tenance program is adequate. A rating of Acceptable or Minimally Acceptable (see § 203.48) on a CEI is required in order to retain an Active status in the RIP.

(b) *Advice and reporting.* Information on the results of IEI and CEI inspections will be furnished in writing to non-Federal sponsors, and will be maintained in Corps district offices.

(1) Non-Federal sponsors will be informed that an IEI rating of Unacceptable will cause the flood control work to remain in an Inactive status, and ineligible for Rehabilitation Assistance.

(2) Non-Federal sponsors will be informed that a CEI rating of Unacceptable will cause the flood control work to be placed in an Inactive status, and ineligible for Rehabilitation Assistance.

(3) Non-Federal sponsors will be informed that maintenance deficiencies found during CEI's may negatively impact on eligibility of future Rehabilitation Assistance, and the degree of local cost-sharing participation in any proposed work. Follow-up inspections can be made by the Corps to monitor progress in correcting deficiencies when warranted.

§ 203.43 Inspection of Federal flood control works.

(a) *Required inspections.* A completed Federal flood control project, or completed functional portions thereof, is granted Active status in the RIP upon transfer of the operation and maintenance of the project (or functional portion thereof) to the non-Federal sponsor. Federal flood control works will be periodically inspected in accordance with 33 CFR 208.10 and Engineer Regulation (ER) 1130-2-530, Flood Control Operations and Maintenance Policies. These periodic inspections of Federal flood control works are also, for simplicity, known as CEI's. If a Federal project is found to be inadequately maintained on a CEI, then it will be placed in an Inactive status in the RIP. [NOTE: This is a separate and distinct action from project deauthorization, which is not within the scope of PL 84-99 activities.] A Federal project will remain in an Inactive status until such
